

## User Guide for Making Children Books

Many dads and moms like to save their children's precious artworks and written stories. Do you ever think of printing books for your kids? Now you can do it with Ximpress at ONLY HK\$230+. It is simple to impress!

### Preparation

- ☺ If your child's work is done in pencil, use a marker to trace over the contents to ensure better printing quality.

- ☺ Design a nice book cover with your child by drawing pictures or making a collage.

- ☺ Include some illustrations in your child's book to make it colorful and fun to read. Write a few sentences in your child's picture book to enrich its content.

- ☺ Include a photo of your child in the About the Author page and write a blurb about your child to make it a memorable experience.

## Scanning

- ☺ Scan your child's work (e.g. drawing, artwork, stories) and save each slide in the size of a 400-600 pdi as jpeg file.

## Production

### 4 EASY STEPS

Step 1	Download Ximbook™
Step 2	Add your files and design your book
Step 3	Online payment
Step 4	Upload your book file

Ximbook™ DIY photobook software supports both MAC and PC computers.

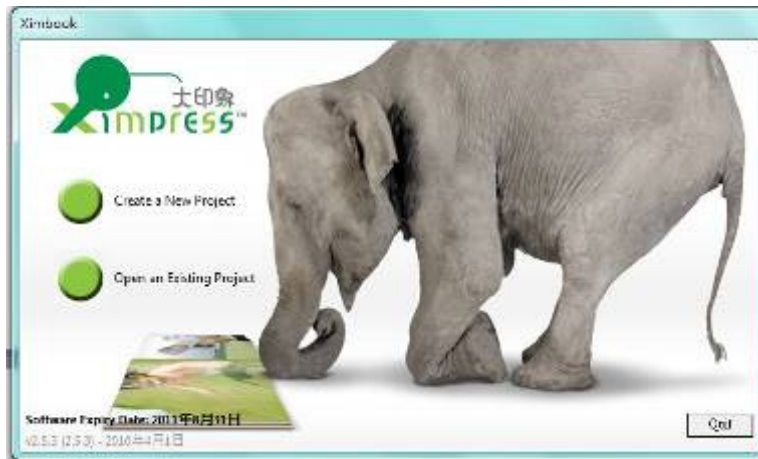

### STEP 1

Download Ximbook™ software and install it.

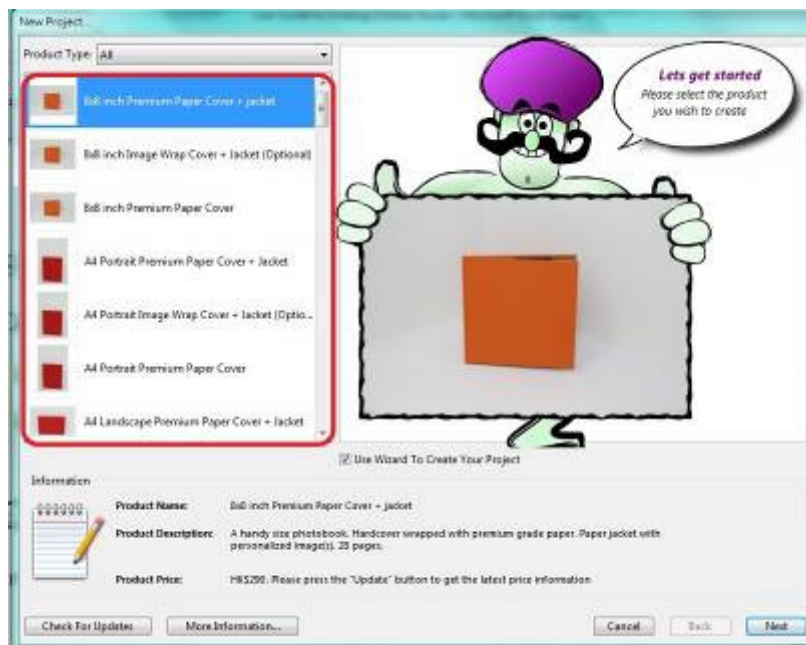

Double click on the Ximbook™ icon on your computer desktop to launch Ximbook™.

Choose whether you want to start a new project or continue to work on a previous project.

## STEP 2

Choose the size and orientation of your desired book. Choose the one with "Image Wrap" if you have a design for book cover.

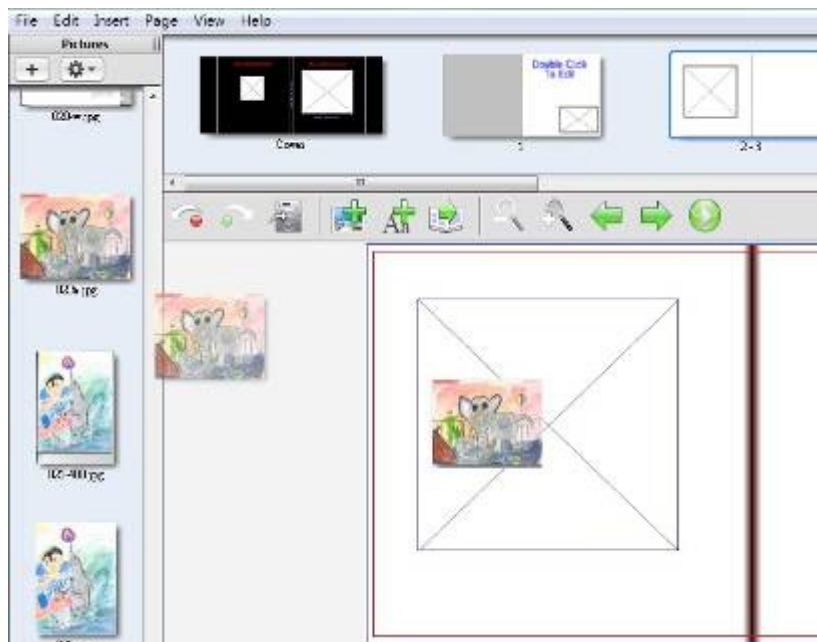

Ximbook™ Wizard is here to make the process easier. Wizard will flow your files into a standard template according to the number of files you add and the number of pages you order for your book. You can edit your layout, and designs later. Or simply click “Skip Wizard” if you do NOT want to use the pre-set layout.

Add your files to Ximbook™.

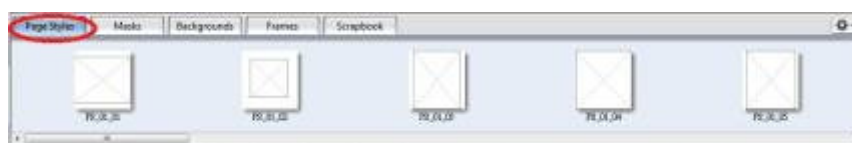

Add some descriptions by clicking “Add Text Box” to make your book look more attractive and interesting!

You can also add new box and drag in any image.

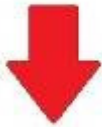

Double-click on the image to adjust the size and orientation to suit your own preference.

Check out the different options on the bottom section. Change the layout of each page to fit your own style.

Retouch your image using our photo editing tools.

### STEP 3

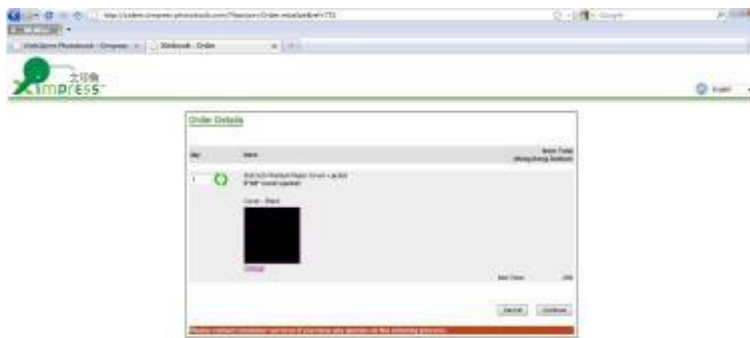

When you have finished editing your book, click on the shopping cart.

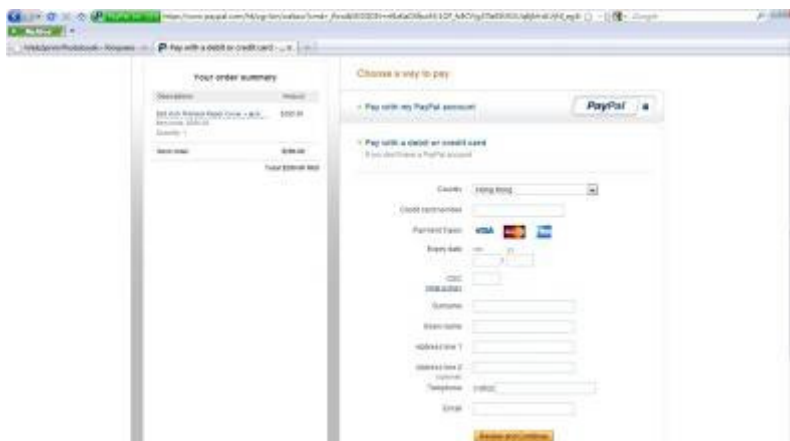

Our Ximbook™ software will check your book and report any errors back to you. You can go back and correct the errors or click OK to continue.

Ximbook™ will direct you to Ximbook™ login page. You are required to create a membership account if you are a new customer. Returning customers can simply enter their user name and password.

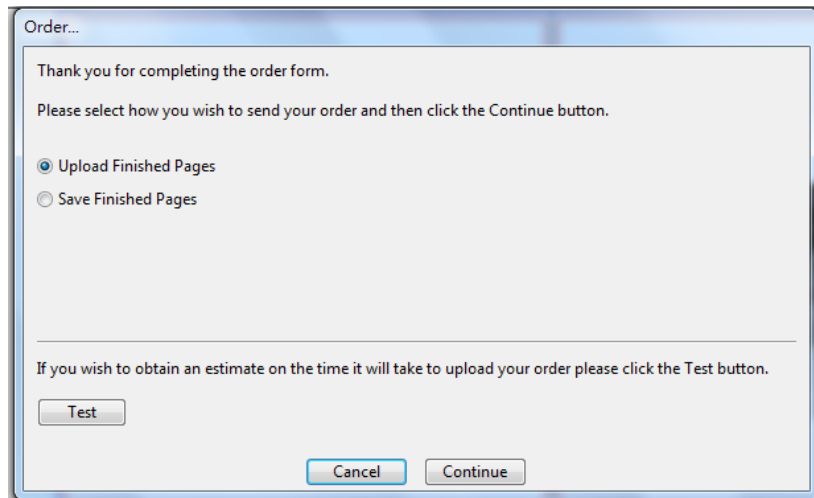

Check the details of the cost of your book and the cover color (if you are ordering a premium paper cover book).

Choose a method of payment.

## STEP 4

Order...

Thank you for completing the order form.

Please select how you wish to send your order and then click the Continue button.

Upload Finished Pages

Save Finished Pages

After completion of payment, you can go back to Ximbook™ and start to upload your photobook. In general, a 28-page (file size about 100Mb) book/photobook takes around 30 minutes to upload (vary by your internet service provider's speed and bandwidth.)

The production lead-time is about 2-3 working days. The delivery lead-time is around 2-3 working days (please allow a few more days for outlying areas delivery).
